GMO Statement - Oenological products

Dear Sirs,

we herewith confirm that the oenological products sold by us, according to EC Directive no. 606/2009 and EC Directive no. 479/2008 have not been genetically modified, and were not produced using genetically modified additives.

The products sold by us do not require labeling according to the current food law regulations regarding genetically modified food, or according to the new EU directives regarding the labeling, approval and traceability of genetically modified food and animal feed*. Should the current situation change, we will inform you according to the above legal requirements regarding the traceability of GMO food and animal feed.

* EC Directive no. 1829/2003 dated 22 September 2003 regarding genetically modified food and animal feed, and EC Directive no. 1830/2003 regarding the traceability and labeling of genetically modified organisms and the traceability of food and animal feed produced from genetically modified organisms and the modification of Directive 2001/18/EC.

We will continue to pay proper attention to the issue of genetic engineering and deal with it critically. At the same time, we do not wish to rule out the option of implementing safe and sensible innovations. Please do not hesitate to contact us if you have any queries regarding genetic engineering.

We will be very pleased to provide the required information.
