

Depth Filtration BECODISC® Range

Premium Mineral-Free Depth Filter Medium

BECODISC stacked disc cartridges from Eaton's Begerow Product Line are characterized by maximum purity. BECODISC offers exceptionally high chemical resistance both in alkaline and acidic applications.

In Eaton's innovative BECODISC stacked disc cartridge's range, high-purity celluloses form a unique structure, which even for microbe removal does not require mineral components.

The specific advantages of BECODISC stacked disc cartridges:

- Very good chemical and mechanical resistance
- Mineral-free, low ion content
- Virtually no ash content
- Low charge-related adsorption
- 20% higher performance
- Rinsing volume reduced by 50%, resulting in reduced process costs

Ingredients

BECODISC stacked disc cartridges are made only of high-purity cellulose and wet strength agents.

Areas of Application

BECODISC stacked disc cartridges can be used for filtration of all liquid media. Application options range from coarse filtration to microbe removal.

BECODISC Stacked Disc Cartridges

BECODISC stacked disc cartridges are very low cationic. This means there is only a minor charge-related adsorption during the filtration. Valuable substances are not adsorbed and remain in the filtrate. The chemical resistance and the mechanical stability are exceptionally high.

Water throughput BECODISC range

Conditions: $\Delta p = 14.5 \text{ psi (100 kPa, 1 bar)}$, Medium: Water at $68^\circ\text{F (20}^\circ\text{C)}$

BECODISC stacked disc cartridges are suitable for applications involving primarily mechanical separation of particles from aggressive media, for example, catalyst and/or activated carbon removal. For applications where the important substance should remain in the filtrate, e.g., in the flavor or cosmetic industry, the BECODISC is ideal due to the low charge-related adsorption.

Type	Utilized depth filter sheet	Nominal retention	Thickness	Ash content	Bursting strength wet	Water throughput at	
		rate μm	in (mm)	%	psi (kPa)	p = 14.5 psi gpm/ft ²	(p = 100 kPa* l/m ² /min)
B1C3	BECOPAD 115 C	0.1 – 0.2	0.16 (4.1)	< 1.0	> 21.8 (150)	0.6	(26)
B123	BECOPAD 120	0.1 – 0.3	0.15 (3.9)	< 1.0	> 21.8 (150)	1.3	(54)
B173	BECOPAD 170	0.2 – 0.4	0.15 (3.9)	< 1.0	> 21.8 (150)	1.9	(77)
B223	BECOPAD 220	0.3 – 0.5	0.15 (3.9)	< 1.0	> 21.8 (150)	2.5	(100)
B273	BECOPAD 270	0.5 – 0.7	0.15 (3.9)	< 1.0	> 21.8 (150)	3.3	(135)
B353	BECOPAD 350	0.7 – 1.0	0.15 (3.9)	< 1.0	> 21.8 (150)	3.9	(160)
B453	BECOPAD 450	1.0 – 2.0	0.15 (3.9)	< 1.0	> 21.8 (150)	7.4	(300)
B553	BECOPAD 550	2.0 – 3.0	0.15 (3.9)	< 1.0	> 21.8 (150)	17.2	(700)
B583	BECOPAD 580	3.0 – 4.0	0.15 (3.9)	< 1.0	> 21.8 (150)	87.6	(3571)

Guide to Choosing the Right BECODISC Stacked Disc Cartridge

B1C3

Fine colloids removal., especially for membrane protection

B123, B173

Microbe removal filtration

B223, B273

Microbe reduction filtration

B353

Fine filtration, activated carbon removal

B453

Clarifying filtration, activated carbon removal

B553, B583

Coarse filtration, catalyst separation and recovery

Recommendations for Avoiding Damage

BECODISC stacked disc cartridges can be used only in the specified flow direction. This applies to product filtering as well as sanitizing with hot water, and sterilizing with the stacked disc cartridges with saturated steam. In order to avoid damage to the filter cells, the system should be protected with a suitable non-return valve.

Refer to the insert included with each BECODISC stacked disc cartridge carton for detailed application information.

Depending on the filtered liquids, the operating temperature should not exceed 176 °F (80 °C). Please contact Eaton regarding filtration applications at higher temperatures.

Intermediate Plates

If more than two BECODISC stacked disc cartridges (12" or 16") with double O-ring adapters are stacked in the housing, install a central spindle for safety reasons. In the event, more than one 16" BECODISC stacked disc cartridge (flat adapter/double O-ring adapter) is used in the housing, Eaton recommends the installation of stainless steel intermediate plates between the BECODISC stacked disc cartridges.

Sterilizing (Optional)

Sterilizing with Steam

The wetted BECODISC stacked disc cartridges can be sterilized with saturated steam up to a maximum temperature of **273.2 °F (134 °C)** as follows:

Steam quality: The steam must be free of foreign particles and impurities.

Temperature: Max. **273.2 °F (134 °C)**
(saturated steam)

Duration: Approx. 20 minutes after steam exits from all filter valves

Rinsing: After sterilizing with 6.6 gal/sqm (25 l/m²) at 1.25 times the flow rate

Filter Preparation and Filtration

Unless already completed after sterilization, rinse the stacked disc cartridges with 6.6 gal (25 l) of water per square meter at 1.25 times the flow rate prior to the first filtration. Check the entire filter for leakage at maximum operating pressure.

High-proof alcoholic solutions and products that cannot be rinsed with water should be circulated with the product. Discard the rinsing solution after rinsing.

Differential Pressure

Terminate the filtration process once the maximum permitted differential pressure of 43.5 psi (300 kPa, 3 bar) is reached. A higher differential pressure could damage the depth filter sheet material. For safety reasons, a differential pressure of 21.8 psi (150 kPa, 1.5 bar) should not be exceeded in applications for separating microorganisms.

Safety

When used and handled correctly, there are no known unfavorable effects associated with this product.

Further safety information can be found in the relevant Material Safety Data Sheet, which can be downloaded from our website.

Disposal

Due to their composition, BECODISC stacked disc cartridges can be disposed of as harmless waste. Comply with relevant current regulations, depending on the filtered product.

Storage

BECODISC stacked disc cartridges must be stored in a dry, odor-free, and well ventilated place.

Do not expose the BECODISC stacked disc cartridges to direct sunlight.

BECODISC stacked disc cartridges are intended for immediate use and should be used within 24 months of delivery.

Delivery Information

BECODISC stacked disc cartridges are available with 12-inch and 16-inch diameters. Further information about filter areas and gasket types can be found in the current BECODISC stacked disc cartridge folder.

Quality Assurance According to DIN EN ISO 9001

Eaton's Begerow Product Line comprehensive Quality Management System has been certified according to DIN EN ISO 9001.

This certification verifies that a fully functioning comprehensive Quality Assurance System covering product development, contract controls, choice of suppliers, receiving inspections, production, final inspection, inventory management, and shipment has been implemented. Extensive quality assurance measures incorporate adherence to technical function criteria and chemical purity and quality recognized as safe under the German legislation governing the production of foods and beverages.
